

Protect Your Smile From Tooth Wear

Tooth wear can make your teeth more sensitive, sharp and chip at the edges.

This could be related to acidic foods and drinks in your diet, stomach acid reflux or even grinding and clenching which often takes place at night.

There are many ways we can help you to protect your teeth, please contact Professor Andrew Eder for further information on 020 7486 7180, info@toothwear.co.uk, www.toothwear.co.uk
